

# SAFETY = SUCCESS

## Turn your safety reports into action

Safety Radar turns frontline safety reports into real-time risk visibility. We use AI technology to give safety managers and field teams a clear view of what's happening on the ground—so they can **take action faster**.

**SAVE TIME · SAVE MONEY · SAVE LIVES**

## Total Visibility at Your Command

Safety Radar was built for the people who make safety happen. Whether you're using legacy forms or enterprise systems, we adapt to your setup and help you strengthen your impact.

## Results That Matter—Faster

- 400% increase in safety engagement
- <1 minute to analyze every report
- 10 days to company-wide deployment
- 100% reduction in DART, TRIR, and LTIR

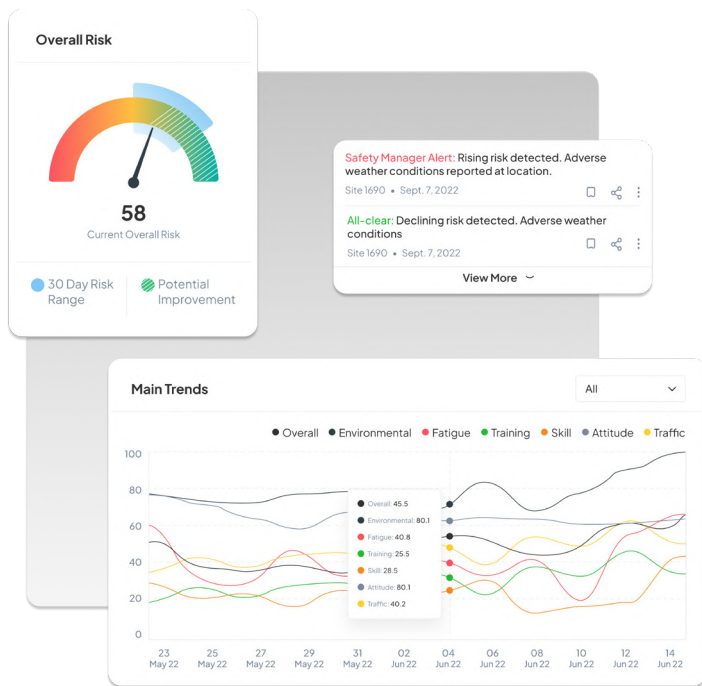

## Why Teams Choose Safety Radar

- Works with your **current system**—or use ours
- Analyzes every report **instantly** across 200+ risk factors
- **Trained** on your company's processes, policies, and structure
- **Certified** to SOC2 standards for data security
- Real-human **support** at every step

# How SAFETY RADAR Works

## Safety Center

Mobile-friendly reporting built for the field. Capture incidents, hazards, or near misses in seconds—anytime, anywhere

## Live Risk Dashboard

Track rising hazards, pinpoint root causes, and monitor exposure by site, region, or timeline. Built for action—not shelf reports.

## Safety Intelligence

Trained on how your company sees risk. Every report immediately helps teams understand what happened—and what could happen next.

## Insights Reports

Highlight causal trends, training gaps, and operational blind spots so you can adapt before the next incident happens.

## What People in the Field Are Saying

★★★★★

“It took me **45 seconds** to submit my first report. I’ve been wanting it to be this easy for 10 years.”

— Welder, publicly traded manufacturing company

★★★★★

“Safety Radar is a **paradigm shift**. In the history of our company, we were never able to manage risk like this.”

— CEO, mid-market energy equipment manufacturer

★★★★★

“This system doesn’t have bias. It helped us stop reacting to the wrong problems and **focus on the real ones.**”

— EHS director, manufacturing company

## Why We Started Safety Radar

**Garrison Haning** (above) and **Matt Weis** (below) built Safety Radar to fix what they saw too often in the field: safety data stuck in PDFs, siloed systems, and slow visibility. Better insight could save lives—if it was fast, trusted, and easy to use.

Garrison, a West Point grad and combat veteran, brings mission-first focus. Matt, an enterprise systems leader, builds tools that work in the field. Backed by Rose Rock Bridge and Energy Innovation Capital, they’re helping teams improve safety—without slowing down the work.

## Smart Safety. Proven Results

A **global energy company** saw safety engagement grow by

**400%**  
within six months

A **logistics company** deployed system-wide reporting in under

**2 weeks**  
without changing legacy tools

**Fortune 500** companies and privately held enterprises processed

**320k+**  
assessments on our platform
